Measures Report
March 10, 2023**

2023 Point-in-Time Count Report

Important Note: All PIT Count numbers submitted by counties are considered preliminary until HUD reviews and releases the final count.

Conducted 2023 Point-In-Time Count on Tuesday, January 24th, 2023.

**A total of 357 individuals
experiencing homelessness were identified that evening.**

Sheltered: 217

Unsheltered: 110

Overall identified fewer individuals experiencing homelessness than in 2022*

*2022 PIT count included emergency shelter for those displaced by Hurricane Ida

Montgomery County Point in Time Counts

**There were no children
found unsheltered during
2023 PIT count.**

**The total number of sheltered
individuals counted was down**

60%

from the 2022 PIT count.

Overall, the 2023 PIT count was more accurate and comprehensive than it has been in years past.

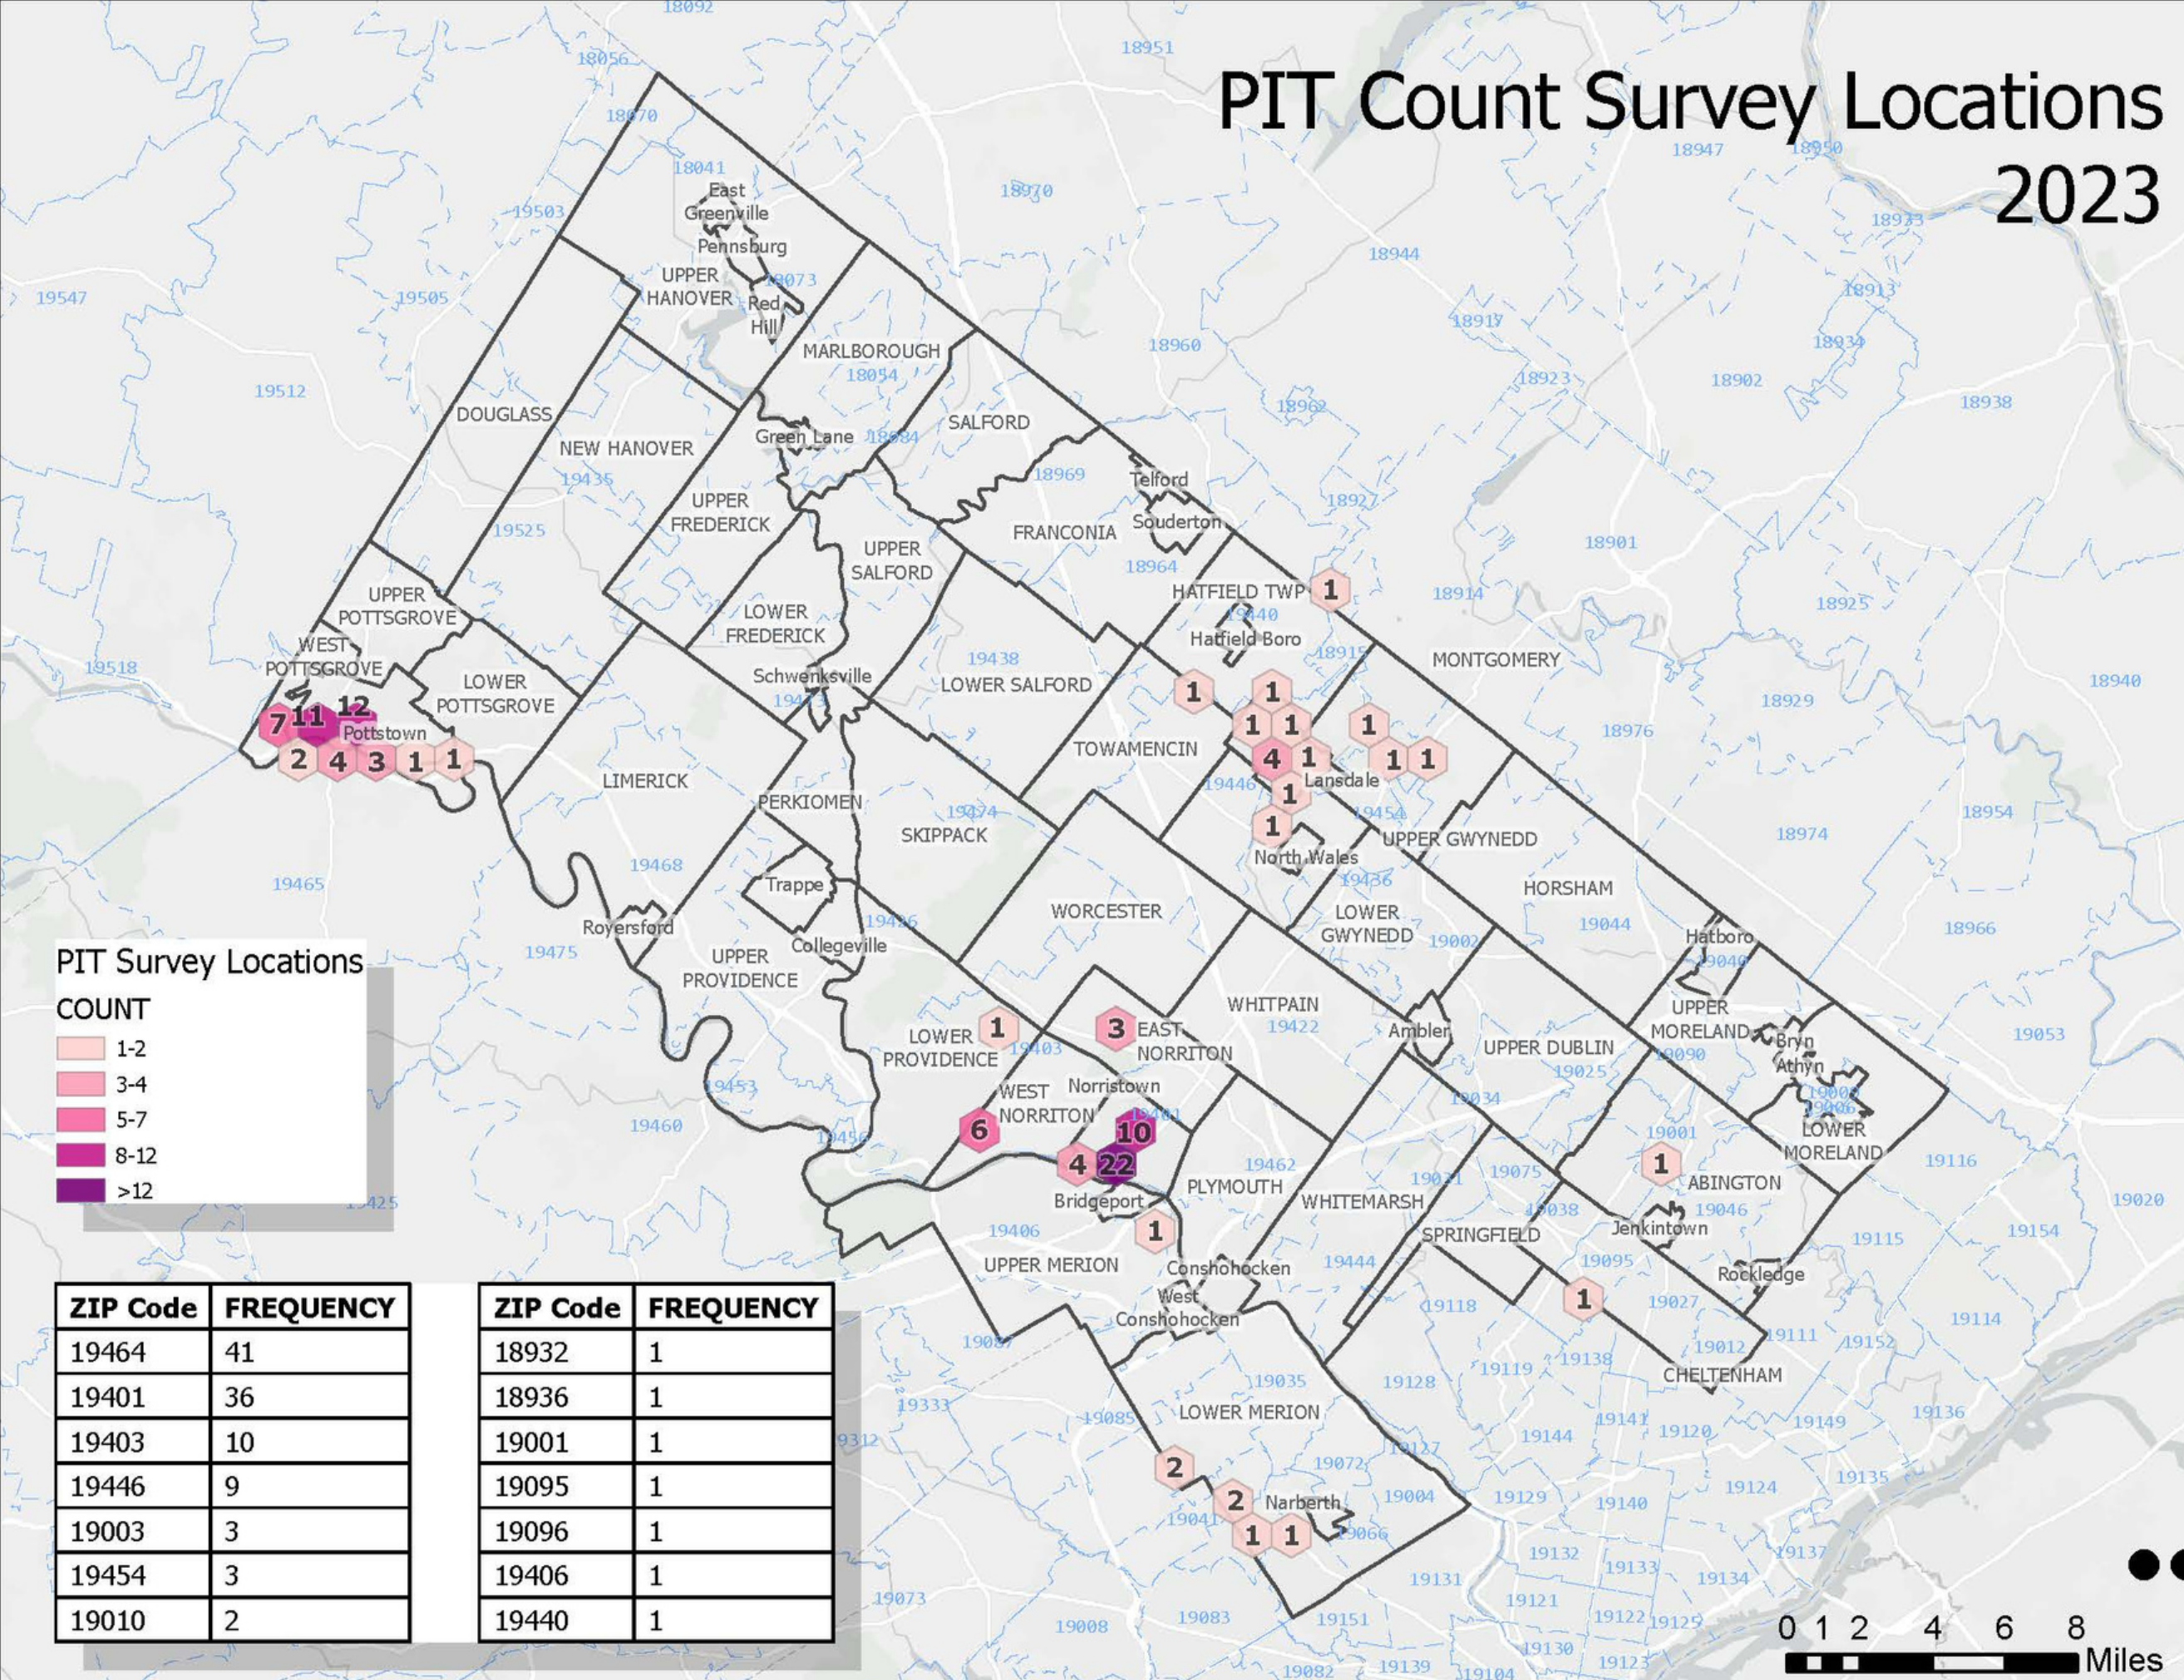

This led to an increase in unsheltered individuals by over 200% (36 in 2022 and 110 in 2023) that were encountered.

This is the result of changes in the Department of Health and Human Services, Office of Housing and Community Development's approach to completing the count - targeted and intentional outreach was made to community leaders with local knowledge for participation in the Count.

78% of the total population Montgomery County is White and 10% is Black.

However, 46% of those counted were White and 48% were Black.

The demographics of those identified during the 2023 PIT count are consistent with the demographics of those counted in 2022.

It is clear that the need of homeless services in Montgomery County is great, and now we have more knowledge of those experiencing it.

2022 System Performance Measures

**Based on data reported during Fiscal Year 2022
(October 1, 2021- September 30, 2022)**

Generally, the data indicates that there is an increased need for provider capacity in Montgomery County, and that Your Way Home providers were performing similarly in 2022, but have encountered a much greater need in our community.

APR Annual Count (SO, ES, TH)

- **41% increase in people experiencing homelessness for the first time**
- **33% increase in the unduplicated total sheltered clients who were enrolled in Emergency Shelter**
- **Amount of time households remain enrolled in an Emergency Shelter decreased from 91 to 68 days, a 25% decrease from 2021.**
- **More individuals utilized Emergency Shelters, they remained there for a shorter length of time, and thus allowed more in need to use shelter services.**

PH 2-Year Exit to Permanent Housing Count

42% increase in the number of people who exited Street Outreach.

Over 10% more of those who were exited from Street Outreach were exited to a Permanent Housing destination

The proportion of successful Street Outreach exits is predictable and consistent, even though the Street Outreach team served significantly more people.

	FY 2021	FY 2022
Persons Who Exited Street Outreach	1103	1571
Exited to Temporary or Institutional Housing	502	505
Exited to Permanent Housing	139	158

Throughout the last two year period (2020-2022), fewer people have exited Your Way Home programming to a permanent housing destination.

Final thoughts:

We are providing services to a similar number of people throughout all programming but there is an increase in those in need of those services entering the system. Without a significant increase in capacity, our performance measures will appear to decrease on an ongoing basis.
